No. 1340.

I.—Situation and Area.

It is bounded on the north, west, and south by the Transvaar, and on the east by Portuguese territory and Tongaland, now part of the Natal Province, and is about the size of Wales, its area being 6,704 square miles. A little more than one-third of the Territory is native area and the remainder is owned by Europeans.

The Territory is divided geographically into three longitudinal regions of roughly equal breadth, running from north to south, and known locally as the high, middle, and low or bush veld. The high veld portion adjoining the eastern Transvaal consists of mountains, part of the Drakensberg Range. These mountains rise in parts to an altitude of over 5,000 feet.

The Swazis are akin to the Zulu and other tribes of the southern eastern littoral. Up to about 100 years ago they occupied the country just north of the Pongolo River, but a hostile chief in their vicinity forced them farther north and, under their Chief Sobhuza, they then occupied the territory now known as Swaziland. This Chief, who died in 1839, was succeeded by Mswazi II. The further order of succession has been Lndongu, Mbandini, and Bhunu, whose son, Sobhuza II, was installed as Paramount Chief in 1921, after a long minority, during which his grandmother, Labotsibeni, acted as Regent.

* In this Report the Financial Statements, which are for the year ended 31st March, 1927, are preliminary and not completely audited. All other details are for the calendar year 1926.

The many concessions granted by Mbandini necessitated some form of European control, notwithstanding that the independence of the Swazis had been guaranteed in the Conventions of 1881 and 1884, entered into between the Government of Her late Majesty Queen Victoria and the Government of the late South African Republic. In 1890, soon after the death of Mbandini, a Provisional Government was established representative of the Swazis, the British and the South African Republic Governments. In 1894, under a Convention between the British and the South African Republic Governments, the latter was given powers of protection and administration, without incorporation, and Swaziland continued to be governed under this form of control until the outbreak of the Boer War in 1899.

In 1902, after the conclusion of hostilities in the Transvaal, a Special Commissioner took charge, and, under an Order in Council (1903), the Governor of the Transvaal administered the Territory, through a local officer, until the year 1907, when, under an Order in Council (1906), the High Commissioner assumed control and established the present form of administration. Prior to this, steps had been taken for the settlement of the concessions question by the definition of the boundaries of the land concessions and their partition between the concessionnaires and the natives. The boundaries of the mineral concessions were also defined and all monopoly concessions were expropriated. Title to property is therefore now clear. In this connection a case brought by the Paramount Chief has been dismissed, on appeal, by the Privy Council (1926).

In 1912, a Special Court was established with an Advocate of the Provincial Division of the Transvaal as President. The other members of the Court consist of the Resident Commissioner, the Deputy Resident Commissioner, and the Assistant Commissioners of the various districts. The Court holds sessions twice a year. All cases are dealt with by three members sitting without a jury. The Court has jurisdiction in civil and criminal cases.

An elected Advisory Council, representative of the Europeans, was established in 1921, to advise the Administration on purely European affairs.

III.—General Events of the Year.

The High Commissioner, the Earl of Athlone, paid a visit to Mbabane during the year.

During the year there were 180 European emigrants and 212 immigrants, the latter being permanent settlers.

According to the census held on the 3rd May, 1921, the European population was 1,239 males and 996 females, totalling 2,235 persons, i.e., an increase of 103.6 per cent. since the 1911 census. The native Bantu population was 52,761 males and 57,534

females, totalling 110,295 persons, i.e., an increase of 5.34 per cent. since the 1911 census. Of this total 5,980 natives were recorded as being absent at labour centres outside Swaziland. Coloured and races other than Bantu had increased from 143 to 308 over the same period.

The general health of the community has been good. In the history of the Territory there has probably never been less malaria. Typhoid was less prevalent than in 1925. Syphilis has shown no abatement amongst the native population, but more voluntary cases were treated than usual, and treatment with novarsenobillon was commenced. Cases of all kinds admitted to the Mbabane Hospital numbered 252, and five deaths occurred; out-patients numbered 6,205.

The Mission Hospital at Bremersdorp is not yet fully equipped, but the Government-subsidized doctor and nurses there are doing good medical work amongst the natives.

The Mission Hospital at Mahamba under a Government-subsidized doctor is open, and during the latter half of the year 52 patients were admitted and 1,023 out-patients treated. This Hospital is near a thickly populated native area.

A Government Hospital is in course of erection at Hlatikulu, and will be in charge of the medical officer there.

The five native lepers sent to the Union Leper Institution at Pretoria have, notwithstanding all endeavours, declined to undergo treatment there and will be repatriated.

Natives desiring to enter into contracts as labourers on mines in the Union continued to take advantage of the deferred-pay system, the sum of £12,169 being paid out, as compared with £9,498 during 1925. The number of passes issued was 5,181 to recruited labourers, and 7,636 to those desiring to travel outside the Territory, and a further 3,275 passes were issued to Portuguese natives recruited by the Witwatersrand Native Labour Association.

IV.—Government Finance.

The total Revenue for the year amounted to £92,090, being a surplus of £232 over the Estimate, and the total Expenditure to £111,835, showing an excess of £2,780 on the Estimates.

Ordinary Revenue and Expenditure for the year amounted to £86,677 and £85,471 respectively, as compared with £87,677 and £85,075 respectively in 1925-1926.

The Extraordinary Revenue and Expenditure during the year amounted to £5,413 and £26,364 respectively.

Public Debt.—This amounted to £55,000, made up as follows:—

(1) The Swaziland Consolidated Loan of £72,500 was reduced during 1923 by the repayment of a sum of £37,500. The Loan now amounts to the sum of £35,000, bearing interest

at $3\frac{1}{2}$ per cent. per annum and repayable, through the medium of a Sinking Fund, within 19 years from the 1st April, 1924.

(2) The Swazi Nation Trust Fund, £20,000, bearing interest at 4 per cent. per annum.

Assets and Liabilities.—On 31st March, 1927, liabilities exceeded assets by £51,922 19s. 2d., inclusive of the Swazi Nation Trust Fund mentioned above.

V.—Progress of Trade, Agriculture, and Industry.

TRADE.

During the year under review the volume of trade, except in grain, was very small. The native crops were not good. Sales of land were effected at fair prices.

No statistics of imports or exports are kept, as, by an agreement with the Government of the Union of South Africa, Swaziland is treated, for Customs purposes, as a part of the Union. Payments due to Swaziland are assessed on a fixed proportion of the total Customs collection of the Union in each year. The amounts so received by Swaziland during the last three financial years were as follows:—

	1924-25	1925-26.	1926-27.
£12,633	£13,860
£12,633	£13,860	£14,052

The above amounts include collections in Swaziland during the last three financial years in respect of spirits and beer manufactured in the Union, as follows:—

	1924-25.	1925-26.	1926-27.
£1,024	£1,225
£1,024	£1,225	£1,293

The imports consist principally of flour, sugar, groceries, hardware, clothing, boots, spirits, oils, farming implements, mining machinery, tools, and general kaffir truck. Most of these goods are imported from wholesale dealers in the Union.

The following is a summary of the principal articles exported from Swaziland during the last three years:—

	Quantities in lb.			Value.		
	1924.	1925.	1926.	1924.	1925.	1926.
Cassiterite Tin	...	559,907	621,600	424,507	59,082	67,722
Cotton (unginned)	...	373,370	430,000	566,000	6,221	7,013
Cotton (ginned)	...	72,850	59,725	132,100	3,640	2,984
Hides...	...	33,644	38,360	135,000	1,298	1,038
Slaughter Oxen	...	4,478,400	4,681,600	3,334,200	64,688	36,759
Tobacco	...	240,500	250,130	780,000	7,909	6,981
Bullion	...	376 oz.	1,308 oz.	1,510 oz.	1,693	5,558
Specie	2,164	5,339
						8,600

CURRENCY AND BANKING.

The currency is British coin and coins of the late South African Republic, which are of similar denominations to the British. All such British and Transvaal coins are legal tender—in the case of gold coins, for payment of any amount; in the case of silver coins, for payment of an amount not exceeding forty shillings; and in the case of bronze coins, for payment of an amount not exceeding one shilling.

Barclay's Bank (Dominion, Colonial and Overseas) has branches at Mbabane and Hlatikulu. The amount on deposit at 31st March, 1927, at the Mbabane Branch was £29,431 as compared with £35,800 at 31st March, 1926.

The Bank also conducts Savings Bank business. The number of savings bank depositors at 31st March, 1927, at the Mbabane Branch was 72, with a total credit of £2,972, as compared with 111 and £2,551 for the previous year.

At five Post Offices in the Territory, Post Office Savings Bank business is conducted. At the 31st March, 1927, the depositors numbered 403, with a total credit of £1,903 as compared with 326 and £1,196 for the previous year.

At the Post Office Savings Bank interest at $3\frac{1}{2}$ per cent. was allowed on ordinary accounts and 4 per cent. on certificate accounts. Interest was allowed at 4 per cent. for 12 months and $3\frac{1}{2}$ per cent. for six months on fixed deposits at the savings bank of Barclay's Bank.

AGRICULTURE.

On the whole the year was a poor one for the farmers. Up to the end of December very little rain fell and in many places crops planted with the rains in September were a complete failure and had to be re-planted, in other parts no crops could be planted.

The maize crop was only about 50 per cent. of the normal. The average price ruling was 21s. a bag of 200 lb.

The cotton crop was fair, the acreage under this crop being approximately 6,000 acres. Although the quality of the lint was good the percentage of lint was small, the average being below 30 per cent.

Mr. R. C. Wood, the Cotton Specialist of the Empire Cotton Growing Corporation, carried out some very useful and instructive experiments in the selection of suitable seed, cotton pest control, and fertilizing. There is no doubt that the work Mr. Wood is doing will be of inestimable value not only to Swaziland but to South Africa generally.

During the year a Tobacco Instructor was appointed. This officer has had experience in tobacco growing and curing in the Transvaal and Rhodesia and the benefit of his advice is already noticeable. With proper methods of cultivation and curing there

is no doubt that this crop will be a very payable one in Swaziland. First-class types of all varieties for pipe, cigarette, and snuff can be produced.

The growing of beans is also on the increase. There is always a good local market, and an unlimited one in the Union, for this crop.

STOCK.

Despite the scarcity of rain, which in parts caused the grazing to be short, the stock remained in good condition although fat cattle could not be exported as early as usual. During the year 5,557 head of cattle were sent to the municipal abattoirs and an average price of 32s. to 35s. per 100 lb. was obtained.

The cattle are increasing very rapidly and some parts are becoming over-stocked.

There was one new outbreak of East Coast fever during the year, but there were only 70 deaths from this disease as compared with 299 in the previous year. The last death was in June, so that the outlook is very favourable.

The other diseases of stock, viz., black quarter, heartwater, gallsickness, and scab were not at all prevalent.

With continuous dipping and inoculation these diseases are gradually being wiped out or becoming less virulent.

LAND.

Title to land in Swaziland is freehold, subject to the mineral rights which are in some cases owned by concessionnaires and in others by the Crown.

During the year only 17 morgen of unencumbered Crown land was sold in small allotments.

Unencumbered Crown land sold in the Territory is subject, before title is issued, to beneficial occupation or, in the low veld areas, to stocking with breeding cattle, except in the case of allotments to returned soldiers. The purchase price is payable in ten equal yearly instalments, outstanding balances bearing interest at 5 per cent. per annum.

Encumbered Crown land, that is, land subject to prior-dated servitudes of grazing or land rights, is sold to the registered holder of the servitude, and the purchase price is usually payable in four equal yearly instalments; there is no condition of beneficial occupation. All land is sold subject to existing mineral servitudes. (A morgen equals 2,116.54 English acres.)

There was a decrease in the number of private land transactions during the year. Prices for freehold land varied between 25s. and 45s. per morgen.

MINING.

Mining is conducted under mineral concessions granted by the late King Mbandini and under the Crown Minerals Order in Council. No new deposits were discovered during the year.

The casiterite produced during the year amounted to 189.5 tons (metallie content 70 per cent.) valued at £52,947, and gold amounted to 1,510 oz. valued at about £6,342, as compared with 277.5 tons of casiterite and 1,308.54 oz. of gold produced in 1925.

Gold mining was carried on for some years at the Piggs Peak and other mines, but, owing to the increased cost of this class of mining, all work has ceased. The Crown owns a few mineral areas, and legal provision has been made for the exploitation of these by the public in the event of payable minerals being discovered. Considerable quantities of gold have been recovered from the Forbes Reef and Piggs Peak mines in the past and there appears to be no reason why further exploitation of this known mineralized area should not take place at an early date in the future. Large deposits of coal exist in the bush veld, but beyond prospecting operations nothing has been done to exploit them.

VI.—Legislation.

The only important Proclamation issued during the year was the Swaziland Pensions Amendment Proclamation No. 13 of 1926.

VII.—Education.

Government primary schools for European children have been established in the Territory, and, at Mbabane, one for primary and secondary education.

The average attendance at these schools during the last three years was as follows:—

1924	329
1925	325
1926	385

At Zombode there is a school for natives. The average attendance at this school during the last three years was as follows:—

1924	92
1925	89
1926	150

Archdeacon Watts, M.A., the founder of the school for Europeans at Mbabane, conducts the school for coloured children at Mpolojeni, where the average attendance during the last three years was as follows:—

1924	60
1925	59
1926	54

Government grants are given to this school and to another school for coloured children at the Florence Mission in the Hlatikhuth District, the average attendance at which was 28.

Boarding or transport bursaries at the rate of 5s. per child per week are paid by the Government for all European pupils whose parents are in poor circumstances and who reside three miles or more from a school.

In addition to the above, the various missions conduct schools and classes in connection with their mission work for natives. During the year the grant made to mission societies for this purpose was £1,000, the same as for 1925. The average attendance at these mission schools during the last three years was as follows:—

1924	2,532
1925	2,958
1926	4,065

A number of the more advanced native pupils, both boys and girls, are sent out every year to be trained in the Union, at Lovedale, Tiger Kloof, and other Institutes. The cost of tuition and board for these pupils, who number about 13, is paid from the Swazi National Fund, which was created, with the concurrence of the Swazi Chiefs, for purposes of direct benefit to the natives. Each native taxpayer is required by law to pay 2s. per annum to the Fund, the expenditure from which is under the control of the Government. Apart from the regular schools, the natives receive religious instruction from 16 religious bodies carrying on work in Swaziland at 206 different centres. The average attendance at these centres during the last three years was as follows:—

1924	9,743
1925	10,172
1926	11,160

VIII.—Climate.

The climate of the high veld has been likened to that of the south of France. The air is bracing and invigorating; light frosts are prevalent during the months of June and July. The mean temperature in winter is about 60° Fahr. The summer is pleasantly warm, the mean temperature being about 75° Fahr. The rainfall is good, the average recorded at Mbabane over 23 years being 53·22 inches.

The middle veld is well watered by streams rising in the ranges on the west. Lying as it does some 2,000 feet below the mountains the summer temperature of this area is warm and humid, but in winter is cool and refreshing. The mean temperature in summer is 80° Fahr. and in winter 65° Fahr. Frost at times occurs in the valley streams, but it is seldom found elsewhere. The rainfall recorded at Bremersdorp over 24 years averages 33·70 inches.

East of, and parallel to, the middle veld lies the bush veld, about 20 miles in width and running north and south through the whole area of the Territory. Many streams come down from the high veld and Drakensberg Range. These streams converge in the bush veld into five rivers. Except for these this area is not well watered. The rainfall recorded at Natalia Ranch over 12 years averages 26·48 inches.

The high veld is free from malaria, which is, however, prevalent in the low veld during some of the summer months. The malaria is not of a virulent type, and is easily avoided by taking the precautions ordinarily considered necessary in any sub-tropical country.

IX.—Communications.

ROADS.

There are good roads to Mbabane from Ermelo, 96 miles; Breyten, 85 miles; and Carolina, 82 miles; and there is a fairly good road from Mbabane to the Portuguese border, from which point to Delagoa Bay the road is very good. This route is largely made use of by motorists from the Transvaal during the winter months. The main port of entry for the southern portion of Swaziland is from Piet Retief, whence roads extend to Hlatikhuth and Mankwana. The main ports of entry for the northern portion of Swaziland are from Ermelo and Carolina, via Osihoek, Barberton (by bridle-path), Hectorspruit, Komati Poort, and Goba. The main roads have been improved by the introduction of piped culverts, but much remains to be done for the betterment of existing roads and improvements in communications generally, for which adequate funds have not been available.

POST, TELEGRAPH, AND TELEPHONE SERVICES.

These services are now, by agreement, under the control of the Postmaster-General of the Union, but are paid for from Swaziland funds.

Post Offices.—Proclamation No. 29 of 1916 extended to Swaziland, with certain exceptions, the provisions of the Post Office Administration Act, 1911, of the Union of South Africa. At the 31st March, 1927, there were the following post and telegraph offices in the Territory:—

Postal Agencies	2
Post, Telegraph, and Telephone Agencies	1
Postal Order Agencies	8
Postal Order, Telegraph, and Telephone Agencies	2
Telegraph Offices only	1
Telephone Offices only	3
Telegraph and Telephone Offices only	2
Money Order, Savings Bank, Post, Telegraph, and Telephone Offices	5

Mail Services.—The following is a list of mail services in operation at 31st March, 1927 :—

Route.	Times.		Conveyance.
	Weekly.	Hours.	
Breyten-Bremersdorp via Oshoek, Mbabane and Ezulweni.	2	10½	Motor.
Ezulweni-Malkerns	2	4	Foot.
Bremersdorp-Stegi	1	30	Pack donkey.
Bremersdorp-White Mbuluzi	2	6	Foot.
Bremersdorp-White Mbuluzi	3	6	Foot.
Stegi-Portuguese Border	2	4	Foot.
Mbabane-Forbes Reef	3	14	Foot.
Barberton-Piggs Peak	1	6	Foot.
Amsterdam-Sandhlana	2	12	Foot.
Piet Retief-Mankaiana	2	5	Motor.
Piet Retief-Hlatikulu	2	4	Foot.
Hlatikulu-Mooihoek	2	4	Foot.
Dwaleni-Berbice	2	4	Foot.
Mhlotsheni-Berbice	2	9	Foot.
Hluti-Mhlotsheni	2	8	Cart and
Maloma-Mooihoek			Foot.

X.—Public Works.

Concrete weirs were built over the Black Mbuluzi, Mzimpofo, and Ngwavuma rivers. There were 128 miles of new telephone lines erected and 36 miles of existing lines duplicated. Ten repair gangs were employed on the roads.

L. J. PUTTICK,

Acting Government Secretary.

Mbabane, Swaziland,

1st June, 1927.
